

# COLD FRONT SETUP RECOMMENDATIONS

**For the serious snowmaker only.**

The Cold Front Snow Gun is upgraded to fit the needs of the extreme home snowmaker or small commercial outfit. This snow gun is heavy-duty and requires the equipment to match. This equipment will typically require upgraded power (220v) and water sources. We recommend using this snow gun if you plan to use 5-10 GPM of water flow.

# SIMPLE SETUP

(ONE PRESSURE WASHER/PUMP)

Standard Cold Front Setup (4"-10"/hr)

Extreme is now standard.... Here are our recommendations:

- Cold Front Simple Package (BYSS Item)
- Campbell Hausfeld 5.5 CFM @ 90 PSI Compressor (or other industrial compressors)
- NorthStar 4 GPM Pressure Washer or Large Triplex Pump\* (Cat Pump, AR Triplex, etc)
- Extension Cords (heavy-duty)

\*Pumps must output 1000 PSI minimum

# MULTI-TRAIN SETUP

(2+ PRESSURE WASHERS/PUMPS)

Double Train Setup (8"-10"/hr)

Running pumps in parallel. Here are our recommended double-train setups:

- Cold Front Double Train Package (BYSS Item)
- Campbell Hausfeld 5.5 CFM @ 90 PSI Compressor (or other industrial compressors)
- (2) NorthStar 4 GPM Pressure Washer or (2) Large Triplex Pump\* (Cat Pump, AR Triplex, etc)
- Rubber Garden Hose
- Extension Cords (heavy-duty)

\*Pumps must output 1000 PSI minimum
